LAYFLAT POLY BAGS

THE BASICS

Our Layflat Poly Bags are designed for a wide range of uses and exhibit extreme durability. Produced with our state-of-the-art manufacturing equipment, they offer superior bottom seal and side weld constructions.

ENHANCED CLARITY & STRENGTH

Built utilizing high grade polyethylene resin and advanced blending techniques, these bags exhibit enhanced clarity and tensile strength.

CHOOSE FROM 7 THICKNESSES

Light weight – 1, 1.25, 1.5 mil
Medium weight – 2 mil
Heavy weight – 3 mil
Extra-heavy weight – 4 mil
Super-heavy weight – 6 mil

TECHNICAL DETAILS

Made from a performance blend of Low-Density Polyethylene that meets FDA/USDA specifications. These are heat sealable and feature a bottom seal or side weld construction.

ISO 9001 QUALITY

We are ISO 9001 Quality Registered. This means every bag we make must pass multiple quality inspections before it's shipped to you. The lot number on every case allows us to track and document the purity of the raw material and its exact specifications.

* ENGINEERED AND MANUFACTURED IN THE U.S.A.

BAGS ON ROLLS

THE BASICS

Our Bags on Rolls demonstrate exceptional clarity for increased visibility. Ideal for hand loading product, these are manufactured with a perforation between the bags for easy dispensing.

- Easy to store – hang anywhere
- Bags stay neat – never folded

TECHNICAL DETAILS

Made from a performance blend of Low-Density Polyethylene (LDPE) that meets FDA/USDA specifications. These are heat sealable and feature a bottom seal construction. Rolls have 3" cores.

DURABLE BOTTOM SEALS & WELDS

Our state-of-the-art manufacturing equipment produces high strength bottom seal and side weld constructions. We take special pride in the durability we build into each bag.

Precision bottom seals combined with tubular construction offer maximum strength.

* ENGINEERED AND MANUFACTURED IN THE U.S.A.

Layflat and Gusseted

CUSTOM CAPABILITIES

With over 58 extrusion lines in 5 manufacturing facilities, we can produce a wide range of custom LDPE and LLDPE bags, sheeting and tubing. Choose from 16 standard colors, 3 venting styles and a host of performance additives.

MADE IN THE U.S.A.

Medium and larger sized items are engineered with optimized clarity and strength to provide over three times the impact and twice the tensile strength of traditional LDPE. These products are exclusively made in the U.S.A. by an ISO 9001 manufacturer.

CUSTOM VENTING

Vented Bags W: 4"-98" W+D max. = 150"
Micro-Perforation W: 10"-60" W+D max. = 118"

PRINTED BAGS

You can design, quote and order printed items with your own custom images. Quotes are generated quickly and include precise technical line drawings that include your image and text sized to scale, ready for sharing as a PDF attachment.

MATERIALS & ADDITIVES

- Anti-Block** For easy opening and loading
- Anti-Static** For static-dissipative film
- HDPE** High-Density Polyethylene for thinner, more economical film
- High Slip** For reduced friction between film
- LDPE** Low-Density Polyethylene for standard strength film
- LLD** High Strength Linear Low-Density
- LLDPE** Linear Low-Density Polyethylene for high strength film
- Metallocene** For high strength film or cold storage
- Non-Slip** To increase friction between film
- Non-Scratch** No anti-block for a smoother film surface
- Postal-Approved** Higher slip & anti-static for film used in USPS mailings
- UVI/UVB** Ultraviolet Inhibitor/Absorber to protect film and contents from the sun
- VCI** Vapor Corrosion Inhibitor to prevent rust

PACKAGING DETAILS

- Cases or Rolls** Loose in a case or on a roll for easy dispensing
- Case or Roll Count** Get the quantity that works best for your customer
- Boxed Rolls** Protect product prior to use
- Cradle Packed Rolls** Use less packaging, save money and provide more stable shipments
- Tray-Packed Rolls** Use less packaging, saves time unpacking

FILM COLORS (SWATCHES ARE APPROXIMATE)

	Black		Blue-Green
	Brown		Leaf Green
	Buff		Dark Green
	Gray		Red
	White		Orange
	Med. Blue		Yellow
	Sky Blue		Pink
	Baby Blue		Purple

Tint For film that you can see through in interior light
Color For film you may not see through in interior light
Opaque For film you cannot see through in interior light (black film only, minimum thickness 2.5 mil)

GUSSETED BAGS IN CASES

THE BASICS

Our Gusseted Bags are ideal for bulky or larger sized items and suitable for a wide range of applications. Like our Layflat Bags, these are manufactured with superior clarity and strength and maintain a durable bottom seal.

TECHNICAL DETAILS

Made from a performance blend of Low-Density Polyethylene (LDPE) that meets FDA/USDA specifications. These are heat sealable and feature a bottom seal construction.

* ENGINEERED AND MANUFACTURED IN THE U.S.A.

GUSSETED BAGS ON ROLLS

THE BASICS

Our Gusseted Bags on Rolls are designed with a tear perforation for easy dispensing and hand product loading. These are suitable for a wide range of applications and are ideal for large or bulky items.

TECHNICAL DETAILS

Made from a performance blend of Low-Density Polyethylene (LDPE) that meets FDA/USDA specifications. These are heat sealable and feature a bottom seal construction.

* ENGINEERED AND MANUFACTURED IN THE U.S.A.

SUFFOCATION WARNING BAGS

THE BASICS

Our Suffocation Warning Bags are perfect for mail-order and shipping applications. These are printed with a standard 3-language suffocation warning with a recycling symbol to meet the standard shipping requirements of many online retailers.

TECHNICAL DETAILS

Made from a performance blend of Low-Density Polyethylene. All layflat bags are heat sealable and feature a bottom seal construction. Lip and tape bags feature a resealable tape closure and side weld construction. Available in cases.

PRINTED LAYFLAT BAGS

- ▶ 14 popular stock sizes, available for same-day shipping.
- ▶ The suffocation warning is printed in the size required for each bag size in 10pt, 14pt, or 18pt text.

SPECIALTY BAGS

MULCH BAGS

Our Mulch Bags are designed to contain a variety of landscaping materials, such as soil, bark mulch, vermiculite, nursery blends and more. These bags exhibit additional puncture and UV resistance to withstand the effects of weathering and rough handling.

PRODUCT FEATURES

- ▶ Six of the most popular sizes and constructions
- ▶ Clear or white film
- ▶ Strong 3.5 mil LDPE with Low-Slip for increased puncture resistance to withstand weathering and rough handling
- ▶ One year UVI prevents damage that could be incurred from the sun's harmful UV rays
- ▶ Standardized venting patterns are available to prevent moisture buildup and mold
- ▶ 100% recyclable at your local drop off center

TECHNICAL DETAILS

Made with 100% Low-Density Polyethylene with UVI and Low-Slip. All bags are heat sealable and feature a side weld construction. Packaged in cases.

FURNITURE COVERS ON ROLLS

Our Furniture Covers are durably designed to fit the most common sized sofas and arm chairs and provide protections from dirt, stains and dust.

- ▶ Ideal for movers, retailers and manufacturers
- ▶ Clear covers are perforated on rolls for fast and easy dispensing
- ▶ Open along the width as shown

TECHNICAL DETAILS

Made from a performance blend of Low-Density Polyethylene. These feature a side weld construction. All bags are available on rolls with a 3" core plug and 1" diameter hole.

STATIC CONTROL

PINK ANTI-STATIC (PAS) BAGS & TUBING

Our Pink Anti-static Bags & Tubing are designed to prevent the buildup of static electricity and protect non-static sensitive parts used in electronics (e.g., nuts, bolts, etc.) during transportation and in storage.

PRODUCT FEATURES

- ▶ Amine-Free
- ▶ Won't corrode polycarbonate surfaces and functions in low relative humidity.
- ▶ Film has a Surface Resistivity of less than 1×10^{12} ohms/sq.
- ▶ 4 mil products meet the full Static Decay Requirements of MIL-PRF-81705E, Type II and EIA-541.
- ▶ Layflat Bags and Tubing are heat sealable.
- ▶ Tubing gives you the freedom to bag your sensitive electrical components for an exact fit.

TECHNICAL DETAILS

Made from a performance blend of Low-Density Polyethylene with an amine-free anti-static additive. All Layflat Bags feature a bottom seal and Reclosable Bags feature a side weld construction. All bags are available in cases. Tubing is packaged on rolls with 3" cores.

STATIC CONTROL

TECHNICAL DETAILS

Made from a single carbon-loaded layer of Low and Linear Low-Density Polyethylene with a conductive additive. These meet the requirements of MIL-P-82646 Rev. B. All bags and tubing are heat sealable. Bags are packaged in cases and tubing comes on rolls.

BLACK CONDUCTIVE BAGS & TUBING

Our Black Conductive Bags & Tubing are designed for packaging static sensitive components where electrostatic contamination is a problem. These meet the requirements of MIL-P-82646 Rev.B.

PRODUCT FEATURES

- ▶ Static shielding notice is stamped in yellow on bags
- ▶ Layflat bags are heat sealable
- ▶ Extended shelf life
- ▶ 100 per carton

TECHNICAL DETAILS

Made of Polyethylene, Polyester, and Aluminum Layers with an Anti-static Coating. Meet electrical and physical requirements of ANSI/ESD S541, EIA 625 and are ANSI/ESD S20.20 program compliant. Tested per MIL-STD-3010 4046 and ANSI/ESD STM11.11. All bags feature a side weld construction. Available in cases.

STATIC SHIELDING BAGS

Our Static Shielding Bags are designed with Faraday Cage protection and 60% visibility for highly sensitive components. This includes items that could be damaged by static in shipment or storage (e.g., circuit boards, hard drives, sound cards, etc.).

RECLOSABLE BAGS

THE BASICS

Our Reclosable Bags are ideal for a variety of applications, including electronics, food service, and retail packaging. A durable zipper closure ensures that contents remain secure and allows for continued bag reuse.

TECHNICAL DETAILS

Made from a performance blend of Low-Density Polyethylene that meets FDA/USDA specifications. All bags feature a single-track zipper closure and side weld construction. Available in cases.

RECLOSABLE BAGS

RECLOSABLE BAGS WITH 25% PCR

Our Reclosable Bags with 25% PCR are designed with a portion of Post-Consumer Recycled material, such as bottles from curbside bins, to keep waste out of landfills. A durable zipper closure allows for bag reuse. Due to the nature of PCR, bag clarity is slightly reduced.

TECHNICAL DETAILS

Made from a blend of Low-Density Polyethylene with 25% Post-Consumer Recycled (PCR) material, these feature a side weld construction and hammer sealed zipper closure. Printed with a standard recycle message and packaged in cases.

RECLOSABLE BAGS

RECLOSABLE BUBBLE BAGS

Our Bubble Reclosable Bags are designed for the transportation and shipment of fragile items through added cushioning and protection.

- ▶ Printed in red "Reusable-Do Not Discard"
- ▶ Protects against impact, moisture, abrasion and dust
- ▶ Meet PPP-B-26, Type I or II, Style 3a

TECHNICAL DETAILS

Made from a performance blend of Low-Density Polyethylene. These feature double walls of 3/16" bubble surrounded by two layers of 3 mil LDPE, a zipper closure, and a side weld construction. Ships as dimensional weight.

Poly Mailers with 50% Recycled Content have this message printed on them.

Made with 30% post-consumer and 20% post-industrial material

POLY MAILERS

THE BASICS

Our Poly Mailers are designed for the secure shipment of items and are highly popular with online retailers. A tamper-proof and water resistant construction prevents any damage that occur during shipment.

PRODUCT FEATURES

- ▶ A white exterior and silver interior provide complete opacity from prying eyes.
- ▶ Tear-resistant and durable.
- ▶ Tamper-evident, with a permanent self-seal adhesive strip for easy closure.
- ▶ Choice of Standard (non-perforated), Perforated, Returnable, and Expansion (bottom gusseted).
- ▶ Returnable Poly Mailers have a second adhesive strip to allow for easy merchandise returns or a second shipment.
- ▶ Expansion Poly Mailers have a bottom gusset to accommodate bulky items.

TECHNICAL DETAILS

Made from a coextruded blend of Low and Linear Low-Density Polyethylene. All mailers provide featuring a tamper proof permanent adhesive closure and side weld construction.

CUSTOM POLY MAILERS

Our Custom Poly Mailers provide a private and secure way to ship items. White on the outside and silver on the inside, these offer complete opacity to keep contents hidden from prying eyes. Choose from a variety of constructions, printed or unprinted:

Perforated or Non-perforated

Select to add a tear strip below the adhesive for easy opening, or choose non-perforated for a tamper-proof construction.

Expandable

These feature a bottom gusset for mailer expansion to accommodate bulkier items.

Returnable

These feature two adhesive strips and two perforations. The top strip folds and seals for initial shipment, and can be opened with the first perforation. The second strip can be folded over and sealed for return shipment.

Printing

Custom design your poly mailer with up to six colors on both sides, spot and process printing. Create a branded image or a full-color, full-bleed mailer.

TECHNICAL DETAILS

Made from a coextruded blend of Low and Linear Low-Density Polyethylene. All mailers feature a tamper proof permanent adhesive closure and side weld construction.

Each construction is available in a range of sizes and gauges. All mailers are water-resistant and feature a tamper-proof permanent adhesive closure and side weld construction. Packaged in cases.

CUSTOM OPTIONS

- Mil: 2-5 Width: 4"-36" Length: 4"-36" Lip: 1"-4"
- Returnable Poly Mailers:
Mil: 2.5-4 Width: 4"-36" Length: 4"-36" Lip: 2.5"-4"

CUSTOM OPTIONS WITH 50% RECYCLED CONTENT

Our Poly Mailers with 50% Recycled Content are designed with a portion of Post-Consumer Recycled (PCR) material and Post-Industrial Recycled (PIR) material to keep waste out of landfills. Available in 7 of the most popular sizes, perforated or non-perforated. These can be printed up to 3 colors on 2 sides. *Note: Full bleed printing is not available.*

TECHNICAL DETAILS

Made from a coextruded blend of Low-Density Polyethylene with 50% Recycled Content (30% PCR and 20% PIR). These feature a tamper proof permanent adhesive closure and side weld construction.

CUSTOM OPTIONS

- Available in 7 sizes, perforated or non-perforated:

4832	24"	1	3

CONSTRUCTION FILM

THE BASICS

Our Construction Film provides protection from weather, dust, debris, and prying eyes. Ideal as a vapor barrier or drop cloth.

TECHNICAL DETAILS

Made from a performance blend of Low and Linear Low-Density Polyethylene. These feature a slit gusset or center fold construction and are available on coreless rolls or rolls with 1.5" or 3" cores.

WHAT IS "NATURAL" COLOR?

G30 film is a transparent white. While it looks white compared to standard clear, it still exhibits good contact clarity. The top film in the photo is G30 transparent white film.

BIN & GAYLORD LINERS/PALLET COVERS

THE BASICS

Our Bin & Gaylord Liners/ Pallet Covers act as a barrier or liner from dirt, debris, inclement weather and other damaging factors. They may also be utilized to keep contents secure.

- ▶ Great for bin and gaylord lining
- ▶ Keeps dirt, dust and moisture off equipment
- ▶ Perforated on rolls for fast and easy dispensing.

TECHNICAL DETAILS

Made from a performance blend of Low and Linear Low-Density Polyethylene. All sheets are center folded and come perforated on rolls with 3" cores.

BIN & GAYLORD LINERS/PALLET COVERS

PALLET COVERS – UVI/UVA

Our Pallet Covers with UVA/UVI provide protection from the sun's harmful UV rays and other damaging elements, such as dust, dirt, and additional weathering. These are an excellent choice for product in outdoor storage.

TECHNICAL DETAILS

Made from a performance blend of Low and Linear Low-Density Polyethylene with 1.5% UVI/UVA. These are heat sealable and feature a bottom seal construction. Packaged on rolls with 3" cores.

* ENGINEERED AND MANUFACTURED IN THE U.S.A.

SHRINK BAGS & FILM

SHRINK BAGS ON ROLLS

Our Shrink Bags are designed to protect pallets and secure loads during transportation. Once the bag is placed over the product, heat is then applied to the film. This results in a glove like cover that prevents the contents from shifting or moving out of place.

Shrink Bags are often used in place of stretch film, here's why:

- ▶ They provide stronger containment for pallets and loads that are heavier, irregularly shaped or will be in outside storage.
- ▶ They serve as a quicker alternative in the palletization process, as they are entirely in one piece.

Shrink Bags may be used to cover pallets containing the following products:

- ▶ Corrugated gaylords
- ▶ Furniture
- ▶ Bricks and blocks
- ▶ Bags of aggregate
- ▶ Sand
- ▶ Other irregularly shaped objects

TECHNICAL DETAILS

Made from a blend of Low-Density Polyethylene with a High Slip additive. These can be shrunk using a heat gun or integral heat tunnel and provide a secure glove-like cover after heat is applied. All bags are available on rolls with 3" cores and open from the side.

SHRINK BUNDLING FILM

Our Shrink Bundling Film is designed for use on automated packaging equipment with integral heat tunnels for a "bullseye" closure. This film ensures that heavier product is securely packaged and will not fall out of place.

TECHNICAL DETAILS

Made from a three-layer blend of Polyethylene and is engineered to provide superior clarity, tensile strength and puncture resistance. All film demonstrates a consistent shrink performance of 60–80% (MD) and 0–20% (TD). Packaged on rolls with 3" cores.

STRETCH FILM

STRETCH FILM BY BERRY

Berry Global is an industry pioneer for oriented, high-strength films. Their commitment to innovation has kept Berry a leader in stretch film technology for over 40 years, with next-generation solutions helping customers do more with less. Choose Berry Hand Stretch Film for an ergonomically superior design, or upgrade to Berry Machine Stretch Film for those higher volume loads that require precise speed and consistency.

MACHINE STRETCH FILM BY BERRY

Made from a blend of Linear Low-Density Polyethylene. Available in the most popular sizes of blown or cast film in gauges from 51 to 115 gauge, with varying cling types (100 gauge = 1 mil). All film is provided on rolls with 3" cores and is available bulk packed on a pallet. Sold by the pallet. Lead times may extend beyond standard stock turnaround times.

Versatile, cast machine film with one-sided cling, works well for most applications, provides outstanding performance consistency and containment.

STRETCH FILM

HAND STRETCH FILM BY BERRY

Made from a blend of Linear Low-Density Polyethylene. Available in the most popular sizes of blown, cast, pre-stretched and narrow width banding film in gauges from 29 to 118 gauge, with varying cling types (100 gauge = 1 mil). All film is available in either a white or kraft box, with Hand Stretch packaged 4 rolls per case. Sold in pallet or case quantities. Lead times may extend beyond standard stock turnaround times.

Hand Stretch Film pricing is market sensitive.
Contact your Rep to get current pricing.

Cost-effective, multipurpose conventional cast hand film with two-sided cling.

FILM BY CASE

ITEM	WIDTH	GAUGE	FT/RL	RL/CS	WT/CS
14002	16"	65	1500	4	27
14035	18"	65	1500	4	30

HIGH-DENSITY (HD) LINERS

Star-Sealed

Coreless Rolls

Flat Packed

THE BASICS

Our High-Density Can Liners are ideal for heavy, wet, or non-sharp waste. HDPE offers superior moisture and vapor resistance, which allows it to contain odors better than LDPE. It can also be extruded at thinner gauges.

PRODUCT FEATURES

- ▶ Made with 100% prime HDPE
- ▶ 100% Recyclable
- ▶ Star-sealed
- ▶ Packaged in convenient dispenser boxes

TECHNICAL DETAILS

Made from a performance blend of High-Density Polyethylene. All liners come flat packed in cases or wound on coreless rolls and feature a star seal bottom construction.

LINEAR LOW-DENSITY LINERS

THE BASICS

Our LLD Liners are designed for puncture resistance and flexibility. These can be used to dispose of lawn debris, broken glass, rough food waste and general office refuse.

PRODUCT FEATURES

- ▶ 0.4–2 mil polyethylene
- ▶ Black and clear bags available in each size
- ▶ Custom sizes available up to 70" wide, in gauges of 0.75–8.0 mil

TECHNICAL DETAILS

Made from a performance blend of Linear Low-Density Polyethylene. All liners come on coreless rolls packaged in convenient dispenser boxes and feature a star-seal construction.

SPECIALTY CAN LINERS

BIOHAZARD CAN LINERS

Our Biohazard Can Liners are designed for the safe transportation and disposal of medical waste. Printed with a standard biohazard symbol.

TECHNICAL DETAILS

Made from a performance blend of Linear Low-Density Polyethylene with a metallocene additive. These are certified to exceed 480 grams tear resistance (ASTM D 1922) and 165 grams impact resistance (ASTM D1709), required by D.O.T. Reg. 173.197 for the transport of medical waste. All liners are made with red film and feature a bottom seal construction. Packaged on coreless rolls in convenient dispenser boxes.

POLYPROPYLENE BAGS

THE BASICS

Our Polypropylene Products are designed with superior clarity to enhance product presentation. A preferred choice for food and retail applications, polypropylene provides highly protective moisture and vapor barrier properties. This delays hydration, keeping food preserved for longer periods of time.

PRODUCT FEATURES:

RECLOSABLE WITH HANG HOLES

- ▶ Crystal clear 2 mil polypropylene
- ▶ Secure zipper closure and side weld construction
- ▶ 1/4" hang hole in lip above zipper

LAYFLAT

- ▶ Crystal clear 1.5 mil polypropylene
- ▶ Side weld construction

GUSSETED

- ▶ Crystal clear 1.5 mil polypropylene
- ▶ Side gussets and bottom seal construction

WICKETED

- ▶ Crystal clear 1 mil polypropylene.
- ▶ Mounted on wickets for manual or automatic loading.

TECHNICAL DETAILS

Made from a performance blend of Polypropylene. Available in reclosable, layflat, gusseted, lip & tape and wicketed constructions. All bags feature a side weld construction and gusseted bags feature a bottom seal construction. These meet FDA/USDA specifications. Available in cases.

STAND UP POUCHES

THE BASICS

Our Stand Up Pouches are ideal for food, electronic, cosmetic, retail, medical and other household applications. Designed with superior barrier properties to allow contents to stay fresher longer and constructed so the pouch stands on its own when full.

Choose from Clear Poly Nylon and Clear PET Front/ Silver Metalized Back. Film material specification documents are available upon request.

TECHNICAL DETAILS

Made with multi-layer film for superior barrier protection. All pouches are heat sealable, featuring a K-style construction, 3/8" seals, tear notches at 1", zipper at 1.5" and 1/4" round hang hole. These are USDA and FDA approved. Measured in outside dimensions (O.D.). Available in cases.

VACUUM POUCHES

THE BASICS

Our Vacuum Pouches are designed for chamber applications. These are popular for food storage, freezer, "bone in," microwave, and boiling applications. Choose from a variety of stock and custom options. Specific application and performance should be evaluated by end user as they apply for suitability.

PRODUCT FEATURES

- ▶ Meet FDA and USDA requirements for food contact
- ▶ Co-extruded Poly/Nylon (PA/PE)
- ▶ MTR < 6 g/sq. m
- ▶ OTR < 60 cc/sq. m
- ▶ Non-channeled for chambered vacuum sealers

TECHNICAL DETAILS

Made from a Poly Nylon blend. All pouches are non-channeled, sealed on three sides and feature a multi-layer construction. Feature a 1/4" seal on three sides and are measured in outer dimensions (O.D.).

WICKETED BAGS

STOCK WICKETED BAGS

Our Wicketed Bags are designed for fast product hand loading or with automated machinery. Choose from a range of stock and custom options.

POLYPROPYLENE WICKETED BAGS

TECHNICAL DETAILS

Made from a performance blend of Polypropylene with a 1.5" lip. These bags are mounted for manual or automatic loading, 250 per wicket on 5" wickets. All bags are heat sealable, feature a side weld and bottom gusset construction and meet FDA and USDA specifications. Available in cases.

MORE OPTIONS: Printing, Venting, Packaging Details

CUSTOM WICKETED BAGS

There's never been an easier way to price, order and secure custom wicketed bags. We can help you create bags for fresh produce, baguettes and beyond; we can even quote any printing needed all on the same quote.

Wicketed bags have many parts; these are the specs you need to provide to get accurate quotes quickly.

1. Bag Dimensions: width, length and gauge
2. Bottom Gusset depth if needed
3. Lip Length
4. Bag Release Type: perforated lip or tear starts
5. Wicket Length of 3" to 6"
6. Wicket Width (space between wickets) 3"-9"
7. Cardboard Header: front, back, both or none
8. Bags Per Wicket: 100-350 bags

The custom bag is now complete! We can process your immediate custom quote or add your graphics, text or even just a placeholder, for a fast quote that includes an accurate technical drawing for proofing.

SPECIALTY FOOD BAGS

ICE BAGS

Our Ice Bags contain 15% metallocene to provide exceptional strength and flexibility at low temperatures to eliminate breakages.

TECHNICAL DETAILS

Made from a performance blend of Low-Density Polyethylene with 15% metallocene. These exhibit higher tensile strength for cold storage. All bags are heat sealable and feature either a bottom seal or side weld construction.

VAPOR CORROSION INHIBITOR

Trusted by over 90% of
Fortune 500® industrial companies
for more than 40 years

- ARMOR VCI Nanotechnology™ is clean and safe and works faster and longer than other solutions.
- ARMOR VCI self-adjusts to the environment (temperature & humidity), replenishes inside the contained package, and does not alter any important metal properties.

How Does It Work?

Simple. Enclose a metal part inside an ARMOR product and VCI's fill up the vapor space in the packaging. VCI inhibiting ions create a layer of protection only 2–3 molecules thick that repels rust.

♣ DID YOU KNOW? Most ARMOR POLY VCI Film is made with at least 30% Post-Industrial Recycled Material (PIR). In addition, all ARMOR POLY VCI products are recyclable, as well as the ARMOR WRAP VCI Paper Line (excludes wax and poly-coated items). Sections with products made from 30% PIR are marked with this symbol: ♣

ARMOR POLY® VCI

DEFENDER™ ♣

Made from multi-layer barrier film with VCI. These innovative rust prevention bags provide clean, safe, and easy to use dry packaging of metal products. Due to its unique film construction, the DEFENDER film can be down gauged 25% from standard mono-extruded film for cost savings. All bags are available on rolls with 3" cores, are printed with the ARMOR logo and feature a bottom seal construction.

DRY COAT™ RUST PREVENTATIVE

Made from a water-based rust preventative liquid. This is a clean, safe and easy-to-use replacement for oil-based or solvent corrosion inhibitors. Apply via dip, spray or flow coat at ambient conditions and Dry Coat will dry to the touch in minutes. Upon drying, Dry Coat leaves a protective rust preventative coating that is not sticky or tacky and does not attract dirt or dust. Dry Coat is easily removed with soap and water or mild detergents. Designed for indoor storage of parts up to one year.

PRINTING

YOUR BAG, YOUR WAY.

CUSTOM PRINTING MADE EASY WITH FAST QUOTES AND PDF PROOF

Custom printing is made simple from complex professional images to simple text, you can rely on our skilled partners to get your printing right. Choose to print on one, two or sometimes three sides (bottom gussets, too). Quotes even include precise technical line drawings that are made available for exact visual of how your print will be positioned and colored, all in a PDF attachment for your customer's review and approval.

PICK A PRINTING STYLE

REGISTERED PRINTING

With our Registered printing you designate the exact placement of an image and text on a bag. Artwork may range from single color images to photo-quality multi-color print with the ability to utilize both PMS spot and CMYK process colors.

RANDOM REPEAT PRINTING

We offer random repeat printing on our bags, film and tubing with one color, one side. This economical style of printing repeats an image or block of text a specified distance apart, with at least one image guaranteed per bag. Due to the nature of Random Repeat printing, images may land on on the seal and perforations that separate bags.

PRINTING

THERE FROM START TO FINISH

Our skilled representative will work with you every step of the way to create a great looking bag to your exact specifications. This ensures a smooth printing process, from proof approval to order completion. If you need help reworking your art, we can help with that, too.

Note: Printed bags made to your approved specification are not eligible for return.

NO ARTWORK? NO PROBLEM!

WE HAVE A SOLUTION FOR THAT.

We can still get you a quote before your artwork is completely done. Just send us the size, number of colors and worry about the artwork later. We also have a number of commonly used Stock Images shown below. If your printed bag just needs a short typed message, we can get that for you, too – just supply your text with the size exactly how you want it to appear.

STOCK IMAGES

Available for both **Registered** and **Random Repeat** Printing.

WARNING: To avoid danger of suffocation, keep this plastic bag away from babies and children. Do not use this bag in cribs, beds, carriages or playpens. This bag is not a toy.
ADVERTENCIA: Para evitar el riesgo de asfixia, mantenga esta bolsa plástica fuera del alcance de bebés y niños. No utilice esta bolsa en cunas, camas, coches o corrales. Esta bolsa no es un juguete.
AVERTISSEMENT: Pour éviter tout risque d'étouffement, gardez ce sac en plastique à partir des bêtes et des enfants. Ne pas utiliser ce sac dans des berceaux, des lits, des voitures ou des parcs. Ce sac n'est pas un jouet.

CUSTOM INK COLORS

PMS Spot Colors

Logos and simple images using solid ink colors are reproduced using one printing plate per color. Choose from thousands of spot colors using the Pantone Matching System (PMS) available online.

Note: Please have PMS colors chosen prior to submittal of artwork.

CMYK Process Colors

Photos and illustrations are reproduced by a printing process using a combination of Cyan, Magenta, Yellow and Black ink dots to create unlimited colors. These require White ink as well when printing on a clear substrate such as poly film.

RANDOM REPEAT INKS

(SWATCHES ARE APPROXIMATE)

CUSTOM MANUFACTURING

Bags, film and tubing are made through a process called blown film extrusion. It's where polyethylene is melted and extruded vertically into a bubble which then makes its way downstream to be slit, folded or sealed.

In addition to over 58 extrusion lines in 5 manufacturing facilities, we offer extensive capabilities through 30 other partner plants. We can produce bags, tubing and sheeting in a wide array of materials, sizes and constructions, all built to your specification. Choose from 16 standard colors, 3 venting styles, printing capabilities and a host of performance additives to create your custom-tailored product.

MADE IN THE U.S.A.

Our poly bags are engineered to provide over three times the impact and twice the tensile strength of traditional low-density polyethylene bags. Exclusively manufactured in the U.S.A. by an ISO 9001 registered provider.

MATERIALS & ADDITIVES

Anti-Block For easy opening and loading

Anti-Static For static-dissipative film

HDPE High-Density Polyethylene for thinner, more economical film

High Slip For reduced friction between film

LDPE Low-Density Polyethylene for standard strength film

LLD High Strength Linear Low-Density

LLDPE Linear Low-Density Polyethylene for high strength film

Metallocene For high strength film or cold storage

Non-Slip To increase friction between film

Non-Scratch No anti-block for a smoother film surface

Postal-Approved Higher slip & anti-static for film used in USPS mailings

UVI/UVA Ultraviolet Inhibitor/Absorber to protect film and contents from the sun

VCI Vapor Corrosion Inhibitor to prevent rust

FILM COLORS & VENTING

FILM COLORS 16 Colors available as tint, color, or opaque

VENTING Standard 1/4" round, 1/4" Butterfly, or Microperforation

FAST QUOTES

Getting pricing and lead times has never been easier or faster. Just contact us with your exact specifications.

MEASURING FOR THE RIGHT SIZE

LAYFLAT BAGS SQUARE CONTAINER OR DIMENSIONAL PRODUCT

Note: Depth is the shorter of the 2 sides.

1. Bag Width = Container Width + Container Depth + 2" for a looser fit.
2. Bag Length = Container Height + Container Depth + 6" to cover contents and tie the bag closed.

EXAMPLES

Container Size: 14" W x 10" D x 32" L

Bag Size: 26" W x 48" L

Object Size: 10" W x 3" D x 16" L

Bag Size: 15" W x 25" L

ROUND CONTAINER

1. Container Circumference = Diameter x 3.14
2. Bag Width = Container Circumference divided by 2, + 1" for a looser fit.
3. Bag Length = Container Height + Container Diameter + 6" for overhang.

EXAMPLE

Container Size: 12" D x 30" L

Bag Size: 20" W x 47" L

GUSSETED BAGS SQUARE CONTAINER OR DIMENSIONAL PRODUCT

GUSSETED BAG – PALLET COVER

WIDTH = wider side

DEPTH = shorter side

HEIGHT = height of block or container

1. Cover Width = **Pallet Width** + 2"
2. Cover Depth = **Pallet Depth** + 2"
3. Cover Length = **Pallet Height** + 1/2 **Pallet Depth**

Example: Pallet Size: 40" W x 36" D x 50" L

Cover Size: 42" W x 38" D x 68" L

GUSSETED BAG – GAYLORD LINER

WIDTH = wider side

DEPTH = shorter side

HEIGHT = height of block or container

1. Bag Width = **Box Width** + 1"
2. Bag Depth = **Box Depth** + 1"
3. Bag Length = **Box Height** + **Box Depth** + 6" to cover contents and tie the bag closed.

Example: Box Size: 18" W x 12" D x 14" L

Bag Size: 19" W x 13" D x 32" L

RECLOSABLE BAGS

RECLOSABLE BAG

Note: Domestically produced custom reclosables come with reinforced hammerseals; our standard stock reclosables and imported custom reclosables do not.

1. Bag Width = Width of Product + 1 1/2"
2. For rigid items, add 1/2" more to the width of the bag to allow the item to fit.
3. Bag Length = Length of product + 1"
4. For thick or bulky items add the Depth of the product to both Width and Length.
5. Add 1/2" to 2" to both dimensions for a looser fit.

EXAMPLE

Flat Product: 2 1/2" W x 5" H

Bag Size: at least 4" W x 6" L

SLIDER TOP BAG

1. Bag Width = Width of Product + 1 1/2"
2. For rigid items, add 1/2" more to the width of the bag to allow the item to fit.
3. Bag Length = Length of product + 1/2"
4. For thick or bulky items add the Depth of the product to both Width and Length.
5. Add 1/2" to 2" to both dimensions for a looser fit.

EXAMPLE

Flat Product: 2 1/2" W x 5 1/2" H

Bag Size: at least 4" W x 6" L
